Multi Compartment WorkStation

Place information and technology where it's needed most.

Strategically placed Proximity WorkStations improve efficiency, reduce staff fatigue and increase patient interaction by integrating equipment, medications, supplies and patient information at the point-of-care.

Customizable

Configurable to meet your specific workflow, IT and medical equipment requirements

Choice of 300+ high-pressure laminate colors from major manufacturers, or custom designed laminates

Heavy-Duty Construction

Made of MDF and all wood materials

All edges painted with a highly durable paint that includes anti-microbial protection

Spacious work surface independently tested and exceeds proof load of 400 lbs

Continuous geared hinge provides strength and stability to the work surface

Spacious, Flexible Work Surface

Large, retractable work surface

Large cut-out for electrical / data

Wire management keeps cabling out of sight and creates a clutter free workspace

Easy to Use and Maintain

Comes with an installation kit including a keyboard tray, cable wrap, cable sleeves, Velcro tabs adhesive mouse pad and manual

Smooth operating dual-gas spring operation

No batteries to recharge

Laminated finishes are easy to keep clean

Sloped top design and curved edges reduce collection of dust and debris

Designed for Maximum Airflow

Sloped top design houses power supply / transformer keeping heat generating source separate

Air flow ventilation is maximized throughout the enclosure by allowing fresh air to enter the lower compartment, rise and freely expel from the upper compartment

Compartments that house heat generating equipment including computers and UPS's are given extra ventilation through the top for maximum release of heat

Proximity Systems carefully evaluates available square inches of ventilation in our products

Increased Safety and Security with a Small Footprint

Reduces staff fatigue and injuries

Curved edges deflect moving objects and are less likely to be snagged by equipment or clothing

An anti-microbial technology protects the paint coating from the growth of bacteria, mold and mildew

Small footprint reduces hallway obstructions during an emergency situation

Lockable compartments keep equipment, patient information, medications and supplies secure

Options Available

- Swivel and Dual Swivel
- Open Face
- Recessed into wall with custom trim
- Adjustable height
- Secured medication storage and / or scanner add-ons available
- Document chart holder
- Mouse catcher
- Lighting
