

embrace EXT-28 Series

Closed

Open

Ensure your workstations are as efficient, effective and advanced as your caregivers. The units in our EmBrace line combine an aesthetically pleasing design with functionality so you can be sure your caregivers can administer quality care that meets the high standards of your facility.

Standard EXT-28 Series Features

Two Compartment Design

The attractive and contemporary two-compartment design with sleek rounded metal edging is perfect for facilities looking for a functional and modern looking cabinet.

Sleek & Secure

The upper lockable compartment stores and protects the CPU, cables and power supply securely. This helps protect against equipment damage and provides caregivers with an unobstructed workspace

Unit Ventilation

Enhanced ventilation provides continuous airflow to protect equipment in the CPU compartment from overheating.

Recessed Storage

Recessed storage in the main cabinet area allows for additional storage of accessories like scanners and small label printers.

Unique Keyboard & Mouse Storage

Proximity's cabinets feature unique keyboard and mouse storage that allows the accessories to dock automatically when the workstation is closed by the user.

Built to Last

The Embrace Series Wall-Mounted Computer Workstations feature work surfaces designed to hold up to 400 lbs. of weight, so even when the workload gets heavy, the workstation remains unscathed.

EXT-28

EXT-28

This sleek Embrace Series Wall-Mounted Computer Workstation allows caregivers to easily interact with patients. Whether updating important information to a patient's file or administering bedside care, this flexible unit increases patient-caregiver interactions by allowing caregivers to complete all necessary tasks in one place.

Articulating Monitor Arm

This unit comes equipped with an articulating monitor arm that supports up to 50 lbs, and allows the user to pull the monitor up to 11" from the back of the cabinet and offers a 10° tilt to minimize glare. With the articulating monitor arm, the user can view the patient and the information on the screen simultaneously using the monitor arm's 180° rotation.

EXT-28-SLIM

When space is of the utmost importance, don't let your computer workstation take up all the room. With the EXT-28-SLIM, caregivers can administer quality care with ease, while patients can enjoy visits and appointments in a comfortable and inviting atmosphere.

Space-Saving Solution

This SLIM Unit is only 4" (10 cm) deep when closed fitting perfectly into hallways and patient rooms without impeding caregiver mobility.

EXT-28-SLIM

EXT-25-OF-SLIM

Similar to our other EXT-SLIM models, this Embrace Series, Wall-Mounted Workstation takes user accessibility to the next level with its state-of-the-art open-faced design.

Open Faced Design

This unit offers an open face design, allowing the monitor to be seen even when the cabinet is not being used

Space-Saving Solution

This SLIM Unit is only 4" (10 cm) deep when closed fitting perfectly into hallways and patient rooms without impeding caregiver mobility.
