

Classic Series, Wall-Mounted Computer Workstation with Monitor Tilt/Arm - Medication Storage

Providing exceptional care isn't a simple task, so why use a regular workstation to do it? The Classic Series CTX 28 MED products are designed with your caregivers in mind and built to store all of the essential items users will need to provide quality care to their patients. The monitor tilt and articulating monitor arm features allow users to comfortably care for patients right at their bedside, while the added storage compartment puts important medication and supplies within reach.

Articulating Monitor Arm

Like the CXT 28-A model, this unit includes an articulating monitor arm that supports up to 50 lbs, and allows the user to pull the monitor up to 11" from the back of the cabinet and to offer a 10° tilt to minimize glare.

Monitor Tilt Bracket

The monitor tilt bracket offers 25° of pan and 13° tilt adjustability allowing the user to position the monitor for best viewing comfort.

Standard Features

Secure Storage Compartment

The center compartment offers secure storage of medication or supplies, and comes standard with an Electronic Keypad Locking System allowing for programmable, secure and convenient accessibility.

Built to Last

The Classic Series Wall-Mounted Computer Workstations feature work surfaces designed to hold up to 400 lbs of weight, so even when the workload gets heavy, the workstation remains unscathed.

Unit Ventilation

Enhanced ventilation provides continuous airflow to protect equipment in the CPU compartment from overheating.

Two Compartment Curved Door Design

Our attractive and traditional three compartment curved door design aids in deflecting collision to the unit, guaranteed to minimize damage and possible injury.

Sleek & Secure

The upper lockable compartment stores and protects the CPU, cables and power supply securely. This helps protect against equipment damage and provides caregivers with an unobstructed workspace.

Keyboard & Mouse Storage

Unique accessory storage allows the keyboard and mouse to dock automatically when the work surface is closed by the user

CXT 28-MED-SVL-T

With increased storage space, a three door cabinet design, as well as adjustable swivel and tilt features, this wall-mounted workstation comes action-packed and ready-to-use.

Monitor Tilt Bracket

The monitor tilt bracket offers 25° of pan and 13° tilt adjustability, allowing the user to position the monitor for best viewing comfort.

CXT 28-MED-SVL-A

Increase patient satisfaction by creating one-on-one caregiver-patient interactions with Proximity's CXT 28-MED-SVL-A motion-enhanced model.

Articulating Monitor Arm

This unit comes equipped with an articulating monitor arm that supports up to 50 lbs, and allows the user to pull the monitor up to 11" from the back of the cabinet, while also offering a 10° tilt to minimize glare. With the articulating monitor arm, the user can view the patient and the information on the screen simultaneously using the monitor arm's 180° rotation.
